Experienced Front End Developer with 5 years in the industry and high-level proficiency in web development. I specialize in JavaScript, Typescript and have professional experience working in but not limited to front end technologies like Angular, HTML, SCSS, Kendo, Material etc. Along with Front End, my interests fall into backend technologies like C# and Python.

JULY 2021 - PRESENT

SENIOR FRONT END DEVELOPER

DELOITTE, HYDERABAD

TECHNOLOGIES: ANGULAR AND .NET CORE (MICROSERVICES)

- Working on a large application with 20+ teams, following agile methodology. I play the role of lead front end developer for one of the teams.
- Worked and delivered multiple functionalities like tree list grids, custom dropdowns, custom modal popups etc using kendo UI library.
- Delivered the notifications to the user with Signal R to maintain the consistency in data across multiple users.
- Implemented state management library NGXS for managing state of the application.
- Delivered high quality code using code quality tools like ESLint, SonarQube, prettier.
- Worked with unit test cases using jest and maintain the code coverage of the project at more than 80%.
- Coordinated with multiple teams in case of inter dependencies within a feature and delivered in timely manner.
- Participated in pull request code reviews on Azure DevOps and triggered pipelines for lower environments(Dev and INT).
- Maintained PBIs and tasks for current sprint and next sprint. Participated in PBI decomposition.
- Maintained documentation for the features that I worked on.
- Presented the developments in the sprint review having participations of over 100 including business stakeholders.

APRIL 2019 -JULY 2021

SENIOR FULL STACK DEVELOPER

TCS, HYDERABAD

TECHNOLOGIES: ANGULAR AND PYTHON (FLASK)

- Worked on a multi modular angular application and implemented server-side custom grids, multiselect dropdowns and modal popup etc.
- Worked with material UI, SCSS, Jasmine, Karma and Sonarqube to deliver high quality and highly functional code.
- Wrote backend APIs using Flask and interacted with database(snowflake) using sql alchemy to query data.
- Deployed the code to NGinx by triggering pipeline by keeping minimal downtime.
- Integrated Power BI reports in the portal using Microsoft power bi client and implemented live filtering on the application.

- Coordinated with product owner on daily bases in scrum calls, requirement discussion and demo reviews.
- Maintained the Kanban board and kept the hours up to date on daily basis.

FEB 2017 - MARCH 2019

FULL STACK DEVELOPER

TCS, HYDERABAD

TECHNOLOGIES: ANGULAR AND .NET FRAMEWORK 4.5

- Built an analytical tool from scratch that shows the incidents activity at organization level by severity.
- Categorized the application into 4 parts by severity of incidents.
- Built a world map and plotted the precise locations where incident has occurred. World map shows P1 and P2 incidents by color classification.
- Used Highcharts and google charts to show visualizations against multiple categories and frequency of incidents.
- Integrated Azure Blob Storage to store the data files and communicated using .net Azure Blob Storage library.
- Pulled the incidents data from service now portal using Rest APIs.

JAN 2016 - JULY 2016

BACK END DEVELOPER

WALMART GLOBAL TECH INDIA, BANGALORE

TECHNOLOGIES: ANGULAR AND JAVA SPRING

- Implement feature to record clicks for different sections of web page and analyze which section is being accessed more frequently.
- Provide quick links to the user by storing most accessed pages at user level.

EDUCATION

JULY 2012 – JUNE 2016

BACHELOR OF ENGINEERING , THAPAR UNIVERSITY

SPECIALITY: COMPUTER ENGINEERING

- GPA: 8.46
